STAKEHOLDER NEEDS ASSESSMENT INTERVIEW GUIDE

Step 3: Semi-Structured Qualitative Protocol for Municipal & Provincial Personnel

RESEARCH TIMELINE STAGE: STEP 3 (NEEDS ASSESSMENT & PROBLEM DISCOVERY)

When to Use: Conducted with municipal and provincial officers during the requirements analysis phase to document workflow bottlenecks, disconnected records, and system requirements.
Target Offices: Municipal Assessor's Office, Municipal Treasurer's Office, Provincial Assessor's Office (Pili).
Student Researchers: Rizalina A. Ortega | John Kenneth P. Calubad | Christian Louise O. Asido
Data Privacy Notice (RA 10173): All responses are confidential and used solely for academic research. No personal taxpayer data is recorded.

Date of Interview: _____	**Interviewer:** _____
Target Office: [ ] Municipal Assessor's Office [ ] Municipal Treasurer's Office [ ] Provincial Assessor's Office	**Recorded:** [ ] Yes (Consented) [ ] Notes Only
Designation / Position: _____	**Years of Service in Office:** _____ years

PART A: OFFICE SETUP AND PERSONNEL PROFILE (ALL PARTICIPATING OFFICES)

1. How many staff members currently work in your office, and what are their primary functional roles?
2. On average, how many property tax transactions or client requests does your office handle on a typical day versus during peak deadline months?
3. Which specific months or days of the week experience the highest volume of client visits, and what drives this surge?
4. What are the most frequent counter requests, certifications, or official documents requested by property owners and other offices?

PART B: MUNICIPAL ASSESSOR'S OFFICE WORKFLOWS AND VALUATION PROCEDURES

5. Could you walk us through the step-by-step process of handling a Transfer of Assessment, from initial document submission at the counter to final release of the new Tax Declaration?
6. What specific documentary prerequisites must property owners submit for each major transaction?
   a. New Tax Declaration (newly declared land, building/house, or machinery)
   b. Transfer of Ownership (Deed of Sale, BIR CAR, transfer tax receipt, previous clearances)
   c. Reassessment / Correction of Value (physical appraisal, reclassification)
   d. Issuance of Clearances (Certificate of Land Holding, Certificate of No Property, Certificate of No Improvement)
7. Once documents are submitted, how do personnel verify authenticity, and who conducts intermediate review and final approval prior to document release?
8. How does your office compute assessed values and tax liabilities from start to finish? Is this done manually using physical appraisal tables, automated spreadsheets, or electronic software?
9. Where and in what physical/electronic format are property records and assessment rolls currently stored? How do personnel retrieve an existing parcel record when an owner inquires?
10. If your office currently utilizes a software system, what specific functions does it perform effectively, where does it fall short, and which procedural steps still strictly require paper handoffs?
11. How frequently do clients experience repeated visits (pabalik-balik) due to incomplete paperwork or clerical errors, and which transaction types cause this most frequently?
12. How does your office organize, protect, and retrieve decades-old legacy property archives (dating back to 1949 or earlier) against wear, deterioration, or loss?

PART C: MUNICIPAL TREASURER'S OFFICE WORKFLOWS AND RECORD RECONCILIATION

13. How does your office receive updated assessment rolls and tax declarations from the Assessor's Office? How frequently does this data exchange occur, and in what format?

14. What is your step-by-step process for verifying whether a property tax has been paid before issuing official receipts or clearances? How do you link payment receipts to property records?

15. On average, how many staff hours per week or month are spent manually cross-checking real property payment records against the municipal assessment roll?

16. How does your office identify, track, and follow up delinquent or uncollected real property accounts?

17. How are statutory prompt-payment discounts, interest penalties, and tax clearances computed and verified across multi-year assessment histories?

18. Does your office utilize an electronic collection database or spreadsheet? Is it digitally synchronized with the Assessor's property records, or does it operate independently?

19. What discrepancies or data mismatches happen most frequently between assessment records and payment rolls, and what protocol is followed to reconcile them?

PART D: PROVINCIAL ASSESSOR'S OFFICE COORDINATION AND APPROVAL (PILI ENDORSEMENT)

20. Which specific assessment transactions strictly require review, endorsement, and final statutory approval from the Provincial Assessor's Office?

21. How are assessment packets physically transported from the municipality to the Provincial Capitol in Pili (physical courier, personnel delivery, mail), and what transit schedule is maintained?

22. On average, how long does the provincial review and approval cycle take from the date of submission to physical return to the municipality, and what factors cause delays?

23. What are the most common deficiencies or clerical errors that result in submitted packets being rejected or returned to the municipality for corrections?

24. Is digital review or electronic endorsement of assessment documents permissible or viable under existing administrative standards? What technical and security safeguards would be required?

25. How does your office currently communicate document processing status, endorsements, or required revisions back to municipal personnel?

PART E: INTER-OFFICE COORDINATION AND INFORMATION FLOW (ASSESSOR, TREASURER, PROVINCIAL)

26. Which assessment and collection transactions demand close inter-office coordination, and through what communication channels is this handled (phone calls, personal office visits, paper memos, chat)?

27. Do frontline staff currently possess visibility into where a document is queued across departments? How do personnel respond when a taxpayer requests a real-time status update?

28. What procedural phase represents the single largest bottleneck or source of processing latency in the end-to-end workflow?

29. What core capabilities should an integrated inter-office web portal provide to eliminate manual friction between the Assessor, Treasurer, and Provincial offices?

PART F: TIME-MOTION ESTIMATES (SELF-REPORTED PERCEPTIONS)

30. For one typical Transfer of Assessment, estimate the average duration spent on each phase:
   a. Counter requirement verification: _____ minutes
   b. Archival record search and retrieval: _____ minutes
   c. Valuation computation and encoding: _____ minutes
   d. Supervisory review and municipal approval: _____ minutes
   e. Inter-office transit and provincial approval queue: _____ days / hours
   f. Total turnaround time from filing to release: _____ days

31. For cross-checking tax payment rolls against property assessment ledgers, estimate the time spent per property record: _____ minutes.

PART G: STAKEHOLDER FEEDBACK ON THE PROPOSED TECHNICAL INTERVENTION

32. The proposed system provides a web-based platform that automates document routing, monitors transaction status in real-time, and synchronizes assessment and tax payment data. Which of your routine tasks would this simplify?

33. What operational or technical concerns do you foresee regarding implementation (internet stability, staff digital literacy, data privacy, workflow adaptation)?

34. What specific features or safeguards are indispensable for your office to adopt the proposed system?

35. Would your office be open to participating in a simulated trial or parallel run alongside current office procedures using masked dummy data?

36. Are there specific local ordinances, tax codes, or institutional procedures that the software engineering team must adhere to in designing the business logic?

37. Do you have any additional recommendations or insights to guide the development of the system?

ACKNOWLEDGMENT & PARTICIPANT SIGN-OFF
I hereby confirm that I have participated in this stakeholder interview and provided feedback for academic research purposes under RA 10173.
