SOFTWARE QUALITY EVALUATION SURVEY (ISO/IEC 25010)

Step 5: Post-Implementation System Quality Rating Instrument

RESEARCH TIMELINE STAGE: STEP 5 (POST-DEVELOPMENT SYSTEM EVALUATION)

When to Use: Administered *after* municipal staff and IT experts test the developed web portal and document routing engine.
Target Respondent Groups: Municipal Assessor staff, Municipal Treasurer staff, Provincial Assessor officers, and IT Experts.
Standard 5-Point Likert Scale: [5] Excellent | [4] Very Good | [3] Good | [2] Fair | [1] Poor
Directions: Following hands-on interaction with the system, please mark the rating (1 to 5) corresponding to each evaluation statement.

Respondent Name (Optional): _____	**Date of Evaluation:** _____
Institutional Department / Group: [ ] Municipal Assessor's Office [ ] Municipal Treasurer's Office [ ] Provincial Assessor's Office (Pili) [ ] IT Expert / Systems Evaluator	**Designation / Role:** _____ **Years of Service:** [ ] < 1 yr [ ] 1-5 yrs [ ] 6-10 yrs [ ] > 10 yrs **Computer Literacy:** [ ] Basic [ ] Intermediate [ ] Advanced

	A. FUNCTIONAL SUITABILITY	5	4	3	2	1
1	The system allows personnel to generate, update, and manage property assessment records according to statutory valuation rules.	[ ]	[ ]	[ ]	[ ]	[ ]
2	The automated document routing engine dispatches assessment packets accurately across Assessor, Treasurer, and Provincial queues.	[ ]	[ ]	[ ]	[ ]	[ ]
3	The payment synchronization module matches municipal treasury payment entries with corresponding property assessment records reliably.	[ ]	[ ]	[ ]	[ ]	[ ]
4	The platform detects and flags discrepancies or duplicate entries between assessment rolls and collection ledgers.	[ ]	[ ]	[ ]	[ ]	[ ]
5	Automated computations for assessed values, basic tax liabilities, and Special Education Fund (SEF) dues are precise and error-free.	[ ]	[ ]	[ ]	[ ]	[ ]
6	The functional scope covers the core requirements necessary to eliminate manual paper transfers and physical reconciliation.	[ ]	[ ]	[ ]	[ ]	[ ]

	B. PERFORMANCE EFFICIENCY	5	4	3	2	1
7	System interfaces, data tables, and interactive dashboards load promptly without noticeable latency.	[ ]	[ ]	[ ]	[ ]	[ ]
8	Document routing status transitions update in real time across departmental monitors upon completion of procedural actions.	[ ]	[ ]	[ ]	[ ]	[ ]
9	Property index search queries (PIN, owner name, ARP number) return matching parcel records within three seconds.	[ ]	[ ]	[ ]	[ ]	[ ]
10	End-to-end transaction duration (e.g., Transfer of Assessment) is noticeably shorter compared to legacy manual workflows.	[ ]	[ ]	[ ]	[ ]	[ ]
11	System responsiveness remains consistent and stable when multiple municipal staff access the platform concurrently.	[ ]	[ ]	[ ]	[ ]	[ ]

	C. USABILITY	5	4	3	2	1
12	User interface layouts and visual hierarchies are clear, structured, and straightforward to navigate.	[ ]	[ ]	[ ]	[ ]	[ ]
13	Frontline staff can comprehend and master primary transactional workflows with minimal technical training.	[ ]	[ ]	[ ]	[ ]	[ ]
14	Routine operational tasks (record intake, validation, clearance issuance) can be accomplished within a few user actions.	[ ]	[ ]	[ ]	[ ]	[ ]
15	The real-time document tracking dashboard transparently displays current document location, queue status, and assigned personnel.	[ ]	[ ]	[ ]	[ ]	[ ]
16	System feedback, input validations, and error notifications provide actionable and understandable instructions to the user.	[ ]	[ ]	[ ]	[ ]	[ ]
17	The software substantially simplifies inter-office coordination and eliminates tedious manual verification handoffs.	[ ]	[ ]	[ ]	[ ]	[ ]

D. SECURITY		5	4	3	2	1
18	The system enforces secure user authentication protocols and prevents unauthorized system entry.	[ ]	[ ]	[ ]	[ ]	[ ]
19	Role-Based Access Control (RBAC) restricts data views and transactional privileges strictly to authorized municipal roles.	[ ]	[ ]	[ ]	[ ]	[ ]
20	Automated session timeouts terminate inactive user sessions to prevent unauthorized terminal access.	[ ]	[ ]	[ ]	[ ]	[ ]
21	An unalterable audit trail accurately logs all document modifications, status updates, and supervisory approvals with timestamps.	[ ]	[ ]	[ ]	[ ]	[ ]
22	Citizen property records and assessment rolls are effectively protected in accordance with the Data Privacy Act (RA 10173).	[ ]	[ ]	[ ]	[ ]	[ ]

E. RELIABILITY		5	4	3	2	1
23	The web application functions stably without sudden runtime crashes, deadlocks, or unhandled system exceptions.	[ ]	[ ]	[ ]	[ ]	[ ]
24	Recorded property assessments, payment logs, and file attachments remain intact and uncorrupted following logout and re-authentication.	[ ]	[ ]	[ ]	[ ]	[ ]
25	Atomic database transactions guarantee that interrupted or failed actions do not result in corrupted, partial, or orphaned records.	[ ]	[ ]	[ ]	[ ]	[ ]
26	The system maintains continuous availability during standard municipal operating hours.	[ ]	[ ]	[ ]	[ ]	[ ]
27	The platform recovers gracefully from intermittent network disconnections without causing transactional data loss.	[ ]	[ ]	[ ]	[ ]	[ ]

F. COMPATIBILITY (PLATFORM INTEROPERABILITY)		5	4	3	2	1
28	The web application functions identically and consistently across major modern web browsers (Chrome, Edge, Firefox).	[ ]	[ ]	[ ]	[ ]	[ ]
29	The system operates smoothly on standard municipal office desktop computers without requiring proprietary hardware upgrades.	[ ]	[ ]	[ ]	[ ]	[ ]

QUALITATIVE FEEDBACK & USER ACCEPTANCE

1. Which feature or capability provided the greatest operational benefit to your workflow?

_____

2. What operational difficulties or technical bugs did you encounter during testing?

_____

3. What modifications or additional features would you recommend for future versions?

_____

4. Would you endorse adopting the proposed system in your office? [ ] Yes [ ] No [ ] Conditional

Reason: _____

EVALUATOR VERIFICATION & SUBMISSION

I hereby certify that I have thoroughly evaluated the software features and that the ratings provided above reflect my genuine operational and technical evaluation of the platform.

Evaluator Signature: _____ Submission Date: _____

Printed Name: _____ Official Designation: _____
